OUR SOLUTION

We have developed an **AI-powered health companion** that helps users analyze their symptoms and find nearby doctors efficiently, providing timely medical guidance and recommendations based on AI-driven insights.

TECHNICAL APPROACH

- **Frontend:** HTML, CSS, JavaScript.

- **Backend:** Django (Python) with REST APIs

- **Google Gemini.**

- **OpenStreetMap API.**

- **Razorpay.**

WORKFLOW/PIPELINE

FEASIBILITY & FUTURE SCOPE

- ◊ AI & ML Enhancement – Improve accuracy using deep learning models (GPT-4, BERT).
- ◊ Multi-Language Support – Integrate AI translation for regional languages.
- ◊ Wearable Device Integration – Sync with smartwatches to track real-time health data.
- ◊ Doctor Consultation Feature – Add video calls & chatbots for instant help.
- ◊ Blockchain for Medical Records – Secure patient data using decentralized storage.
- ◊ Mobile App Version – Develop a Flutter/React Native app for better accessibility.
